Free Webinar

Wednesday, May 3rd
11:00am – 12:00pm

Come learn about Convergence! A website designed through community collaboration to address climate-health vulnerabilities in the Carolinas.

Convergence represents a collaboration among climatologists, public health researchers and professionals, environmental scientists, social science researchers, and community stakeholders to identify and address the impact of extreme climate events on communities in the Carolinas. The convergence of communities and researchers mean we share knowledge and skills, and collaborate to understand the different ways communities are vulnerable to extreme climate events and how they can act to increase their resilience to these events.

Experts:

Ashley Ward, Climate Integration and Outreach Associate, CISA

Chip Konrad, Director, Southeastern Regional Climate Center

Sara Smith, Public Health Educator, Division of Public Health, NC Department of Health and Human Services

Lorin Bruckner, Data Visualization Librarian, Davis Library Research Hub, UNC-Chapel Hill

Learn About:

- Information and tools to **build community resilience** against climate extremes
 - Heat, Drought, Hurricanes, Severe Weather, Winter Storms
- **Visualizing community vulnerabilities**
- **Communicating science** to community partners
- **Open access** research database

Questions? Contact: Ashley Ward at arward@email.unc.edu or 919-962-7470
