

### Session Speakers

Megan Robinson - The Collider (moderator)  
Jenny Dissen - NOAA NCEI / NC State University  
Josh Dorfman - The Collider  
Jeff Hicks - FernLeaf Interactive  
Dave Michelson - UNC Asheville's NEMAC

### Session Title

Data-Driven Climate Innovation

### Session Description

The use of data - climate, environmental, and socioeconomic - in developing innovative technological solutions to a changing climate is increasingly prevalent in the public and private sectors. Hear from a cross-section of organizations, from data providers to data users, on the value of data-driven products, services, and applications. Individual presentations will be woven together through the lens of technology and innovation - and end in a discussion on the emerging role of entrepreneurship in climate adaptation.
